- Apple accessibility guidelines: <https://developer.apple.com/accessibility/ios/>
- Android accessibility guidelines: <https://developer.android.com/guide/topics/ui/accessibility/index.html>
- tota11y - <http://khan.github.io/tota11y/> - I love this tool. it's the one I mentioned in a question about web accessibility tools. Even though I talked about native stuff, we do web stuff too and this tool has been great. Everyone should be using this and I can't recommend it enough. It let's you run an accessibility check on any website and gives you suggestions to improve color contrast, fix alt tags, etc.
- Colorsafe - <http://colorsafe.co/> - this wasn't mentioned, but it's an awesome tool to find AA or AAA compatible colors based on a provided background color

The tool I was trying to think of that will monitor your site for accessibility stuff (among other things) is called SiteImprove: <https://siteimprove.com/>

- WCAG checklist: <https://www.wuhcag.com/wcag-checklist/>
- Color contrast checker: <https://webaim.org/resources/contrastchecker/>
- Color palette generator with colorblindness simulator: <https://colors.co/>
- Sina Bahram at MCN: <https://www.youtube.com/watch?v=f7OMljzKfEg>
- Elise Roy TED talk: https://www.ted.com/talks/elise_roy_when_we_design_for_disability_we_all_benefit
- A11y Project: <http://a11yproject.com/>
